

ZENNS
International

Discover beauty from within.

ZENS International CO., LTD.

Established in 2012, the company was made to develop and produce, as well as distribute cosmeceutical products to protect, treat, and maintain healthy skin.

The term "Cosmeceutical" refers to the combination of cosmetics and pharmaceuticals; the combination of ingredients with proven efficacy with cosmetics.

While cosmetics only have the concept of temporary enhancements of outer appearance, cosmeceutical products focus on treatments to help your skin be beautiful from within.

Our company currently produces and supplies medical devices and cosmeceutical products to many countries around the world. It is a brand that takes customers back to the most beautiful moments in their lives. Based on professional knowledge in the beauty industry, we will show you products with worry-free ingredients and efficient age-reversing solutions.

Participating in major overseas exhibitions, we will accurately identify the needs of the beauty market that changes rapidly. With that, we will constantly make efforts to create new beauty trends to remunerate customers with a happier life.

Thank you.

ZENS International Co., Ltd.

SCPN EAC

Being Composed of Deoxycholic Acid and safe ingredients, **DeFAT Plus** is an efficient way to dissolve fat cells through the combined process of Lipolysis and Adipolysis, a process that ensures the elimination of fat cells without any rebound phenomenon.

The DeFAT Plus solution guarantees a permanent effect in eliminating fat cells instead of shrinking, leading to no rebound phenomenon. Also, it promotes the replacement of dissolved fat cells to collagen as well as disposal of fat cell residues through lymphatic circulation.

Lipo Solution is an effective fat dissolution product made of natural key components. Compared to many fat solution products, Belleza Care Lipo Solution is made of effective key components. Other than simply helping with lipolysis, it also helps tighten skin. You can expect more than just slimming with Belleza Care Lipo Solution.

Key Ingredients

- **Carnitine** - Promotes Fat Breakdown
- **Juglans Regia Seed** - Is a source of Omega-3
Alpha-Linoleic Acid (ALA)

Boost your skin and reveal all its potentials with the **Belleza Care Skin Booster**, an effective toner that helps prep your skin through the following:

- Increase of skin absorption capabilities
- Skin Hydration
- Clearing away dead skin cells
- Brightening skin and improvement of dark spots

Application

1. Start with the use of an MTS roller to help promote the absorption of ingredients and to maximize the effects of the product.
2. Apply one vial per session (With the use of MTS, Sessions are recommended every 10-14 days.)

Key Ingredients

Hyaluronic Acid · PDRN · Glutathione

• SOOTHING

Vit E	· Anti-inflammatory · Skin soothing
PDRN	Cell Regeneration
Blue Tansy Oil	Anti-inflammatory
MC-BNC	Baby Amino Acid

• WHITENING

Vit C	· Skin Whitening Cyanocobalamin · Antioxidant
Rose Oil	Skin tone / calm
MC-BNC	Baby Amino Acid

• ANTI-WRINKLE

Vit A	· Skin Elasticity · Collagen
Immortelle Oil	Elasticity / Anti aging
MC-BNC	Baby Amino Acid

The **Color Therapy** is a skin product that targets different purposes. Without added artificial color, the ampoules colors are derived from its natural plant extracts. Each color represents a different concern and has different main effects.

Application

1. Use an MTS roller or device to make micro-entrances for important ingredients, avoiding lip and eye area.
2. Apply a whole vial per session (Use in intervals of a minimum of three days to one week.)

EXORAM

ACTIVE REGENERATIVE EXOSOMES

SCPN

EXORAM - H

EXORAM - F

Key components are known to boost growth of cells in certain areas (EGF-epidermis, etc.)

In comparison to adipose stem cells, exosomes are made with higher purity, only giving the essential efficacy that stem cells could also provide, but with greater concentration disregarding miscellaneous cell parts.

Mesenchymal cell EV's in this product contain various growth factors and antioxidants essential for cell-to-cell communication and physiological conditions modulation.

EV's promote cell growth and survival and is essential to the immune system

youth and beauty 
Thaliafill

The difference between 'Thaliafill Plus+' and 'Thaliafill' is the presence or absence of lidocaine.

Brand Name	Type	Composition	Syringe Volume
	Soft 	HA20mg/ml None Lidocaine	1.0ml
	Medium 	HA20mg/ml None Lidocaine	1.0ml
	Hard 	HA20mg/ml None Lidocaine	1.0ml
	Soft 	HA20mg/ml Lidocaine 0.3%	1.0ml
	Medium 	HA20mg/ml Lidocaine 0.3%	1.0ml
	Hard 	HA20mg/ml Lidocaine 0.3%	1.0ml
	Body 	HA24mg/ml Lidocaine 0.3%	10ml

Rew'Bay PLLA

What Else?

- Carboxymethyl Cellulose (CMC)
- Our product takes longer to decompose, making maintenance period longer.
- Lactic Acid is similar to that present in the body, making it safer and giving it a lower risk of inflammation.
- **Rew'BAY PLLA** contributes more to the formation of collagen by 40% (V.S. PDLA, PDLLA), giving safer volume for longer periods.

PLLA

- Fills volume through time
- Promotes natural collagen stimulation
- Wrinkle improvement and volume recovery from 4 to 6 weeks after procedure, 2-3 years retention period
- Takes maximum 30 minutes per procedure

VS

HA and Botox

- Shrinks in time
- Volume via Swelling and material filling
- Immediate volume, based on the skills of administrator, 6 months average retention period
- Takes maximum 2 hours per procedure
